

Free-Motion Quilting for Beginners

Free-motion quilting—that's a technique that most beginner quilters wouldn't consider learning. Not so according to **Sewing With Nancy** guest, **Molly Hanson**, who taught herself free-motion quilting early in her sewing career. Molly's goal is to instill confidence in new quilters.

Free-Motion Quilting for Beginners is this week's online **Sewing With Nancy** feature. Watching Molly free-motion quilt is the best way to learn her techniques. **Watch online**, on Public TV, or on **DVD**.

Stippling

The most common free-motion quilting technique is stippling. Its versatility, light texture, and ability to blend and not compete with the piecing make it a favorite among quilters. If you've been hesitant to learn this technique, fear not! Learn and use Molly's muscle memory technique to master this first of many free-motion quilting options.

Loop de Loops and Handwriting

What free-motion design should I stitch first? Where should I start? These are questions that you might ask. Molly's answer is, "Start by stitching your name or a favorite word!" The basic loop de loop design—just like cursive—allows you the freedom to incorporate words into free-motion quilting designs.

Pebbles and Chains

Pebbles and Chains consist of a space filled with as many touching circles as possible. Pebbles can fit just about anywhere. Even a single row of pebbles, called a chain of pearls, can be beautiful in small spaces.

The random winner of [The Absolute Easiest Way to Sew](#) is Clara who said, At one time I made all my clothes and did not have to alter the pattern. It has been a few years since I have sewn apparel. Now that my body has changed I find that using the pattern without altering is not possible and is a problem for me. So, an easy pattern altering and fitting would be extremely helpful. Thank you for all you do for us.
